Chapter 1 Introduction

1.1 What is a constraint satisfaction problem?
1.2 Formal Definition of the CSP
1.3 Constraint Representation and Binary CSPs
1.4 Graph-related Concepts
1.5 Examples and Applications of CSPs
1.6 Constraint Programming

Chapter 2 CSP solving — An overview

2.1 Introduction
2.2 Problem Reduction
2.3 Searching For Solution Tuples
2.4 Solution Synthesis
2.5 Characteristics of Individual CSPs

Chapter 3 Fundamental concepts in the CSP

3.1 Introduction
3.2 Concepts Concerning Satisfiability and Consistency
3.3 Relating Consistency to Satisfiability
3.4 (i, j)-consistency
3.5 Redundancy of Constraints
3.6 More Graph-related Concepts

Chapter 4 Problem reduction

4.1 Introduction
4.2 Node and Arc-consistency Achieving Algorithms
4.3 Path-consistency Achievement Algorithms
4.4 Post-conditions of PC Algorithms
4.5 Algorithm for Achieving k-consistency
4.6 Adaptive-consistency
4.7 Parallel/Distributed Consistency Achievement

Chapter 5 Basic search strategies for solving CSPs

5.1 Introduction
5.2 General Search Strategies
5.3 Lookahead Strategies
5.4 Gather-information-while-searching Strategies
5.5 Hybrid Algorithms and Truth Maintenance
5.6 Comparison of Algorithms

Chapter 6 Search orders in CSPs

6.1 Introduction
6.2 Ordering of Variables in Searching
6.3 Ordering of Values in Searching
6.4 Ordering of Inferences in Searching

Chapter 7 Exploitation of problem-specific features

7.1 Introduction
7.2 Problem Decomposition
7.3 Recognition and Searching in k-trees
7.4 Problem Reduction by Removing Redundant Constraints
7.5 Cycle-cutsets, Stable Sets and Pseudo_Tree_Search
7.6 The Tree-clustering Method
7.7 j-width and Backtrack-bounded Search
7.8 CSPs with Binary Numerical Constraints

Chapter 8 Stochastic search methods for CSPs

8.1 Introduction
8.2 Hill-climbing
8.3 Connectionist Approach

Chapter 9 Solution synthesis

9.1 Introduction
9.2 Freuder's Solution Synthesis Algorithm
9.3 Seidel's Invasion Algorithm
9.4 The Essex Solution Synthesis Algorithms
9.5 When to Synthesize Solutions

Chapter 10 Optimization in CSPs

10.1 Introduction
10.2 The Constraint Satisfaction Optimization Problem
10.3 The Partial Constraint Satisfaction Problem
